

UID EXPERIMENT – 5A

NAME :

HEMALATHA ST

ROLLNO :240701189

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface using Axure RP

AIM:

To simulate the lifecycle stages of UI design using the RAD model and develop a simple interactive interface (Register + Dashboard) using Axure RP.

RAD Model - Customized for Your UI

1. Requirements Planning Phase

Key Features Identified

From your UI screens, the system supports:

- Product browsing (Home screen)
- Category-based filtering
- Cart management
- Checkout process
- Order confirmation

User Actions

- Open application
- Browse/search products
- View categories
- Add items to cart
- Modify cart (increase/decrease quantity)
- Proceed to checkout
- Enter delivery & payment details
- Confirm order

2. User Design Phase (Based on Your Screens)

Home Screen

- Displays:
 - Location & search bar
 - Special offers banner
 - Categories section
 - Flash sale products
- Purpose:
 - Entry point for product discovery

Interaction:

- Search → Find products

- Category click → Navigate to Categories page
- Product click → Add to cart

Categories Screen

- Displays:
 - Product categories (Fruits, Dairy, Snacks, etc.)
- Purpose:
 - Helps users filter products easily

Interaction:

- Select category → View related products
- Add items → Goes to Cart

Cart Screen

- Displays:
 - Selected items
 - Quantity controls (+ / -)
 - Price details
 - Subtotal & total

Interaction:

- Modify quantity
- Remove items
- Click Checkout → Navigate to Checkout page

Checkout Screen

- Displays:
 - Shipping address
 - Payment details
 - Order summary
 - Delivery options

Interaction:

- Edit address/payment
- Confirm order → Navigate to Order Confirmation

Order Confirmation Screen

- Displays:
 - Success message
 - Order ID
 - “Track Order” button
 - “Continue Shopping” option

Interaction:

- Track order → Order tracking
- Continue shopping → Back to Home

3. Construction Phase

Prototype Development

- Built using Axure RP
- Created multiple screens:
 - Home
 - Categories
 - Cart
 - Checkout
 - Order Confirmation

Interactions Implemented

- Home → Categories
- Categories → Cart
- Cart → Checkout
- Checkout → Confirmation

Testing Done

- Verified navigation flow
- Checked button functionality
- Ensured smooth user journey

4. Cutover Phase

Final Output

- Exported prototype (HTML / Axure Cloud)

User Guidance

- How to browse products
- How to add items to cart
- How to complete checkout
- How to track orders

Conclusion:

The RAD model helped quickly design and refine the UI. Using Axure RP, an interactive prototype with a registration system and dashboard navigation was successfully developed.
