UID EXPERIMENT 6

AIM:

To design and compare different mobile app UI themes (Light, Dark, and Color variants) for a ride-booking application named **Glitz**, and evaluate user feedback on aesthetics and usability using GIMP.

PROCEDURE:

Step 1: Install GIMP

- Download and install GIMP from the official website.
-

Step 2: Create a New Project

- Open GIMP
 - Set Canvas Size: **1080 × 1920 pixels** (mobile screen resolution)
-

Step 3: Base Layout Design

1. Divide Sections:

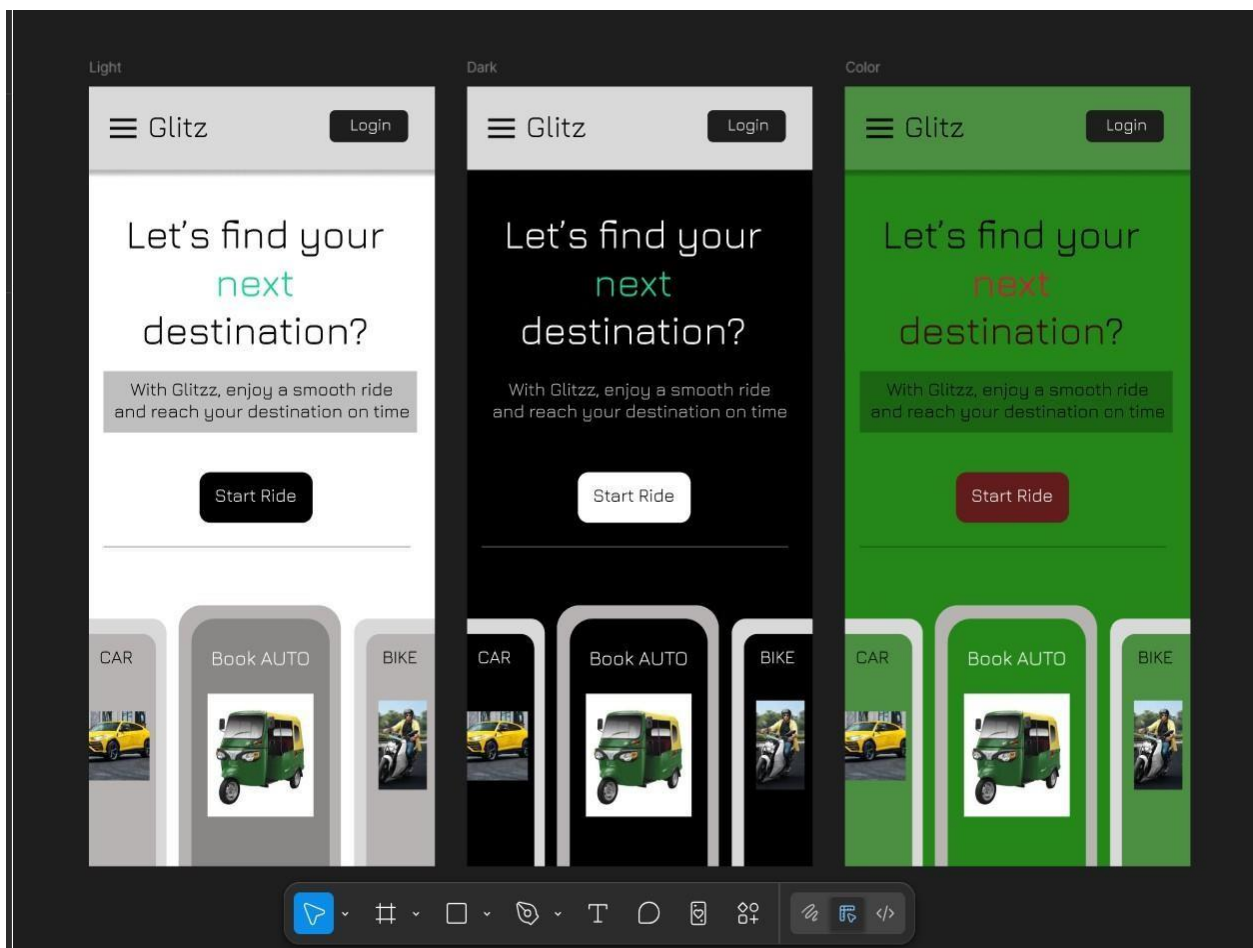

- Header (Menu + App Name + Login button)
- Main Content (Tagline + Description + CTA button)
- Service Section (Car / Auto / Bike options)
- Use **Rectangle Select Tool** and **Bucket Fill Tool**

2. Add UI Elements:

◦ **Text Tool:**

- App Name: *Glitz*
- Heading: *"Let's find your next destination?"*
- Description: *"With Glitz, enjoy a smooth ride and reach your destination on time"*

- 0 **Buttons:**
 - Login
 - Start Ride
 - 0 **Service Cards:**
 - CAR
 - Book AUTO
 - BIKE (with images)
3. **Layer Organization:**
- 0 Header
 - 0 Menu Icon
 - 0 Login Button
 - 0 Title Text
 - 0 Description Text
 - 0 Start Ride Button
 - 0 Service Cards (Car, Auto, Bike)
-

Step 4: Create Colour Variants

1. Duplicate Layouts:

- Create three versions:
 - **Layout 1: Light Theme**
 - White background, black text, simple UI
 - **Layout 2: Dark Theme**
 - Black background, white text, minimal glow
 - **Layout 3: Green Color Theme**
 - Green background with contrasting red/black elements

2. Edit Colours:

- Use **Bucket Fill Tool / Colorize Tool**
- Adjust button colors and text contrast

3. Export Layouts:

- Layout1.png (Light)
 - Layout2.png (Dark)
 - Layout3.png (Color/Green)
-

Step 5: Collecting User Feedback

Method:

- Shared all three UI designs with users
 - Asked feedback based on:
 - Visual Appeal
 - Usability
 - Readability
 - Colour Preference
-

USER FEEDBACK:

Layout 1 (Light Theme):

- Clean and simple design
 - Easy to understand layout
 - Suggestions:
 - Improve contrast
 - Add depth to buttons (shadow, elevation)
-

Layout 2 (Dark Theme):

- Modern and stylish look

- Good for night usage
 - Issues:
 - Slightly cluttered lower section
 - Tight spacing between elements
 - Suggestions:
 - Increase spacing
 - Improve readability of cards
-

Layout 3 (Green Theme):

- Eye-catching and unique design
 - Good spacing and structure
 - Clear CTA buttons
 - Feedback:
 - Looks professional
 - No major changes required
 - Suitable for branding
-

FINAL RECOMMENDATION:

Preferred Layout: Layout 3 (Green Theme)

Reason:

- Modern and visually attractive
 - Better user engagement
 - Balanced spacing and layout
 - Clear readability and usability
 - High overall user satisfaction
-

Step 6: Iterate and Refine

1. **Refinement:**
 - Improve button styles (rounded + shadows)
 - Maintain consistent spacing
 - Enhance contrast for accessibility
2. **Final Testing:**
 - Conduct another feedback round
 - Ensure:

- Smooth user experience
- Clear navigation
