Exercise 3a

Name:Hemalatha ST

REG NO:240701189

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io

CRAVEE: Food Ordering App

1. Introduction

This document provides a detailed breakdown of the **CRAVEE** food ordering app prototype. The design focuses on a bold, high-energy user interface that streamlines the process from user authentication to order confirmation.

2. Objective of the Design

- **Vibrant Branding:** Utilize a high-contrast red and white theme to evoke excitement and appetite.
- **Frictionless Authentication:** Incorporate modern login methods, including a "Swipe to Login" feature for a playful yet efficient entry.
- **End-to-End Experience:** Map out the complete user journey, including item selection, cart management, and secure payment processing.
- **Visual Clarity:** Use clear, large-scale imagery and bold typography to make food items easily identifiable.

3. Overview of the Prototype

The prototype utilizes a **monochromatic red background** with white interactive elements to create a cohesive brand identity. It transitions through five distinct screens to simulate a real-world purchasing flow.

Key Characteristics:

- **Dynamic Login:** Combines traditional input fields with gesture-based navigation.
- **Grid-Based Menu:** Organizes food items in a scannable grid with clear pricing.

- **Transparent Billing:** Provides a full breakdown of costs, including delivery fees and taxes, before final payment.

4. Design Structure

4.1 Authentication (Login Page)

- **Inputs:** Includes dedicated fields for "Enter email" and "Enter password".
- **Action:** Features a standard "Login" button and an alternative "Swipe to Login" gesture-based slider.
- **Branding:** Displays the "CRAVEE" logo prominently to establish brand presence immediately.

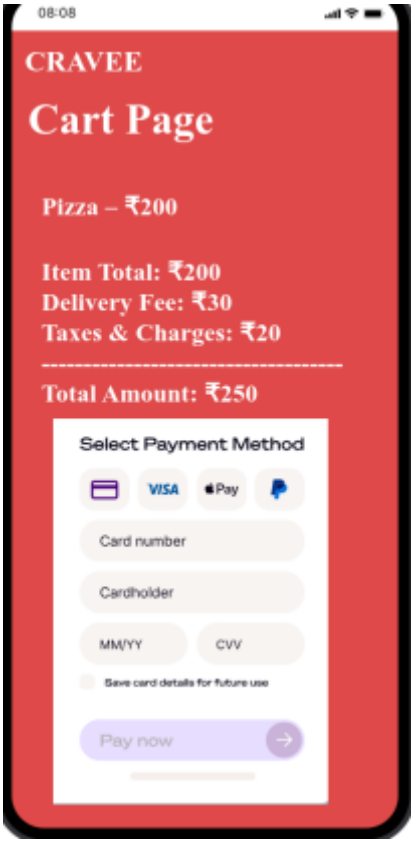
4.2 Navigation & Discovery (Home Page / Food Menu)

- **Search:** A "Search Food" bar is placed at the top for quick navigation.
- **Items:** Showcases popular options like **Burger**, **Sandwich**, **Italian Pasta**, and **Classic Pizza**.
- **Pricing:** Each item displays a clear price point (e.g., ₹150 or ₹200) below the image.

4.3 Item Details (Screen 3)

- **Product Focus:** Highlights a specific item, such as the "Classic Pizza," with a descriptive tagline: "Delicious cheesy pizza with toppings".
- **Conversion:** Offers two clear calls to action: "ADD TO CART" and "BUY NOW".

4.4 Checkout & Transactions (Cart Page)



- **Bill Breakdown:** Lists the Item Total (₹200), Delivery Fee (₹30), and Taxes & Charges (₹20) to reach a **Total Amount of ₹250**.
- **Payment Integration:** Allows users to select between **VISA**, **Apple Pay**, and **PayPal**.
- **Security:** Features fields for Card Number, Cardholder Name, Expiry (MM/YY), and CVV.

4.5 Success State (Confirmation Page)

- **Feedback:** Displays a clear "Order Successful!" message once the transaction is complete.
- **Summary:** Confirms the specific item ordered (Pizza) and the amount paid.
- **Loop:** Provides a "Back to Home" button to encourage further browsing.

5. UI/UX Design Principles

- **Color Psychology:** The heavy use of red is intentionally designed to stimulate hunger and create a sense of urgency.
- **Visual Hierarchy:** Large "Pay Now" and "Login" buttons use high-contrast white-on-red or purple-on-white to guide the user's eye to the next step.
- **Information Transparency:** By breaking down fees on the cart page, the design builds user trust through honesty.

6. Tools and Technologies Used

- **Proto.io:** Used for creating the high-fidelity wireframes, interactive transitions, and the "Swipe to Login" logic.
- **High-Resolution Assets:** Integration of realistic food photography to enhance visual appeal.

7. Advantages of the Prototype

- **Functional Checkout:** Unlike basic menus, this prototype simulates the entire financial transaction process.
- **User Retention:** The "Back to Home" feature on the confirmation page ensures the user journey doesn't hit a "dead end".

8. Future Enhancements

- **Live Tracking:** Integration of a real-time GPS map to track the delivery driver.
- **Order History:** A profile section to allow users to quickly re-order their favorite "CRAVEE" meals.
- **Discount Logic:** A field to enter promo codes on the Cart Page.

9. Conclusion

The **CRAVEE** prototype successfully delivers a bold and functional mobile experience. By prioritizing a clear checkout flow and high-impact visuals, the design provides a professional framework for a market-ready food delivery application.
